

## Engine and Component Strip, Rate and Build

Millbrook offers engine strip, rate and build services which meet strict OEM standards. It uses market-leading equipment to ensure excellent measurement and photographic quality throughout the process.

Millbrook's highly experienced team conducts controlled engine component ratings and evaluations. Stringent quality procedures are applied to measure function, performance and build quality using standard and tailored methods to meet customers' needs. Fault reporting includes top-quality high resolution and macro photography of the components, with an option to securely access a live stream from the laboratory anywhere.

### Facilities

- Dedicated and secure clean rooms
- Complete customer confidentiality with secure access
- Four strip, rate and build bays with full component layout areas
- Secure online conferencing with live ultra-high-quality video and photography
